

CENTURIA PRO400

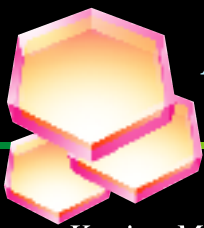

for Portrait

FILM FOR COLOR PRINTS

With its outstanding granularity and versatility for demanding on-location shots, Konica Minolta CENTURIA PRO 400 is the optimal choice for high-quality portraits!

The essentials of imaging

Rich gradations and ultra-fine grain for face tone depiction. New! Konica Minolta CENTURIA PRO 400

Featuring the high-performance technologies of the CENTURIA SUPER film series, Konica Minolta CENTURIA PRO 400 is a new type of color film — a high-speed ISO400 film that nevertheless offers superior granularity, sharpness, and color reproduction, in addition to meeting strict professional requirements for gradations and neutrality.

Subtle and Beautiful face tones

Consistently delivers beautiful face tones with natural transitions from highlights through shadows. Highly effective for flash shots.

Smooth gradations and exceptional neutrality to meet professional requirements

Soft, low-contrast gradations make this the ideal film for portraits, where natural color reproduction is paramount. From the subtle whites of wedding dresses through the blacks of tuxedos, meets the demanding requirements of professional photographers.

Robust design guarantees long-lasting high quality

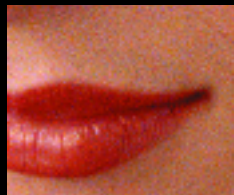

The robust design reduces degradation in speed and granularity due to natural radiation. Photographers can count on high performance from the film, no matter when it is used. CENTURIA PRO 400 will appeal to a wide range of users.

Granularity on the highest level in its class

CENTURIA PRO 400

Competitor's ISO400

Super-fine crystal technology delivers ultra fine grain in an ISO400 film. Combining fast speed with high image quality, CENTURIA PRO 400 is easy to use, providing rich expressivity under various shooting conditions.
